ABOUT US

Pharbest Pharmaceuticals, Inc. is a FDA approved pharmaceutical company located in Farmingdale, New York, dedicated to maintaining the trust and confidence of its consumers. Since our inception in 2005, our mission has been to provide service along with high-quality products, manufactured with the purest ingredients, offered at an affordable price.

As part of our dedication to excellence, all of our products are manufactured on-site. We concentrate on the wellbeing of our customers by testing and confirming the quality of our ingredients in our state-of-the-art laboratory before incorporating them into our products.

We also strongly believe in quality healthcare that is affordable to everyone. That is why we offer products equivalent to national brands in quality, formula, size and structure, for a fraction of the cost.

Today, we stand at the threshold of a new adventure as we develop, manufacture, market and distribute a new brand name into the world of pharmaceutical products. We strive for the best, always!

MISSION

Our mission is to formulate world-class drug products and supplements through our efficient and state-of-the art manufacturing process to help citizens worldwide attain reliable and quality healthcare at a reasonable cost.

VISION

Our vision is to establish "Pharbest" Brand as an impeccable manufacturer in the global pharmaceutical industry.

RESEARCH & DEVELOPMENT

To ensure the aggressive growth of our company, we place our utmost emphasis on our Research and Development program. Our experienced scientists oversee all aspects of R&D starting from formulation to analytical method development, batch scale up and process validation.

Formulation Development:

- *Characterization of Physical and Chemical Properties*
- *Compatibility Studies*
- *Formulation Optimization*
- *Scale-up for Commercial Manufacturing*
- *Process Validation*

Analytical Development:

- *Cleaning Validation*
- *Method Validation*
- *Dissolution Profiling*
- *Stability Studies*

Our scientists developed analytical testing methods to meet all project specifications in compliance with the U.S. Food and Drug Administration (FDA), International Conference of Harmonization (ICH) and US Pharmacopoeia (USP).

MANUFACTURING

Pharbest continuously meets and remains in full compliance with all U.S. regulatory agencies, including FDA, OSHA and operates according to meticulous Standard Operating Procedures (SOPs), which are in strict compliance with current Good Manufacturing Practices (cGMP).

Our operational staff are highly educated and trained in (cGMP) and other relevant issues including continuous improvement opportunities in production. We perform all facets of the manufacturing process in-house such as pharmacy, blending, compression, coating, encapsulation, and band sealing. These provide us with unparalleled control over the quality of our products.

Our manufacturing department is equipped with V-Blenders, Double Cone Blender, Natoli/Manesty and Stokes Compression Machines, Encapsulation and Band Sealing Machine as well as Accela Cota. There are separate dust collecting systems for each manufacturing piece of equipment to prevent cross-contamination.

Capacities:

- *7 million tablets/day expandable to 10 million/day*
- *1 million capsules/day*
- *Film and Enteric Coating for Caplets and Tablets*
- *Capsule band sealing for tamper resistance*

QUALITY & REGULATORY

Quality permeates everything we do at Pharbest from R&D, vendor selection, manufacturing, packaging, to customer service. All manufacturing operations and order distributions are constantly monitored by our Quality Assurance team to ensure conformance with cGMP, as required by the FDA.

The consistency, efficiency and safety of Pharbest Pharmaceuticals' products is achieved by implementing a comprehensive Quality Assurance system. The entire facility is environmentally controlled to maintain the integrity of product quality.

Pharbest takes enormous pride in meeting all regulatory statutes governing its products. Regulatory Affairs remains dedicated to quality and compliance throughout the product lifecycle, maintaining FDA cGMP in Pharbest facility and enjoy an enviable cGMP inspection reputation. Pharbest's in-house experts are highly knowledgeable about regulatory requirements in U.S. markets. They work closely with customers around the U.S. to prepare U.S. FDA documents for eCTD submission and drug approval.

LABORATORY SERVICES

Our laboratory services ensure that we maintain the highest possible quality in every product that we ship to our customers. We follow strict analytical procedures and perform continuous testings throughout the manufacturing process. Our laboratory is equipped with efficient and high performance instruments such as:

- HPLC
- UV
- Spectrophotometer
- Fluorometer
- Atomic Absorption Spectrophotometer
- FTIR
- Dissolution and Disintegration test apparatus
- Karl-Fisher Titrator and moisture analyzer
- Room Temperature and Accelerated Temperature Stability Chambers

PACKAGING

Packaging is one of the most important aspect of a superior quality product. Pharbest customizes packaging configurations to meet every customer's specifications. The label designs adopted by Pharbest ensures the ease of use with standardized color coding to promote accuracy and safety.

Our packaging department is equipped with automated

- *Bottle Scramblers*
- *Slat Counters*
- *Cottoners*
- *Cappers*
- *Labelers*
- *Induction sealers*
- *Videojet Printers*
- *Cartoners*
- *Shrink Tunnels and Case Pack Sealing Machines*

Utilizing our high speed, fully automated packaging lines at our in-house facility, Pharbest can bottle more than 1 Million bottles per month.

Quality Assurance professionals, experienced operators and packaging engineers closely monitor each packaging line from setup to changeover.

Warehouse, Distribution & Customer Service

Our warehouse is temperature controlled to ensure superior quality of raw materials and finished products. We are equipped with easy access for transportation and overhead doors to allow for goods to move in and out efficiently, ensuring prompt and on time deliveries.

Our trucking partners ensure the delivery of the finished products in a timely manner without affecting the quality of our products.

Satisfying customers with all their queries is always a priority for us. Our customer service representatives are always available to keep you informed of product status, new products, promotions, current pricing and answer any other questions or concerns that customers may have.
